SOLVE Px for the Corporate Bond Market

AI-Generated predictive pricing for the **Corporate Bond Market**

AI Prediction Meets Trader's Intuition

SOLVE Px™ for the Corporate Bond Market is the AI predictive pricing tool for over 100,000 corporate bonds (HY and IG). It predicts the next trade level for size specific high yield and investment grade trades with proven, industry leading precision.

About SOLVE Px

- Real-time generation of price, yield, and spread for every quote

- Pricing delivered at bid, mid, and offer levels

- 99%+ coverage for fixed rate corporate bonds

- Model trained on ~300 features, including SOLVE's proprietary quote data

- AI-driven models optimized for low margin of error

- Size specific on-demand pricing by CUSIP via SOLVE Quotes™

Use cases for SOLVE Px

- Gain pricing insight for less-liquid bonds and key data points on liquid securities

- Leverage reference data, trade data, and SOLVE's proprietary Quotes data

- Establish a reliable benchmark for buying, selling, and comparing corporate bonds (high yield and investment grade)

- Use as an input or validation check alongside internal pricing models

- Enable price discovery, portfolio tracking, and streamlined workflows for market makers

- Empower PMs and risk teams to quickly detect and investigate price changes

View Px Over Time for a Bond

SOLVE Px enhances price transparency in Investment Grade and High Yield bonds by integrating two powerful components:

✓ **SOLVE Quotes:** these are crowd-sourced from market participants, providing a rich source of real-time bids and offers.

✓ **AI-Generated Predictive Pricing:** a fully machine learning-driven model trained on hundreds of inputs derived from reference data, trade data, and quote data.

This dual approach delivers a more transparent, accurate, and comprehensive view of predictive bond prices, benefiting traders, portfolio managers, researchers, wealth managers, heads of desks, and chief investment officers in making more informed decisions.
