

SOLVE Quotes™ | FlexTrade FlexFI®

Clarity Powered Through Millions of Data Points

Workflow-embedded pre-trade transparency for fixed income execution

SOLVE's fixed income pricing data is integrated directly into FlexTrade's fixed income execution workflow, FlexFI, giving mutual clients access to actionable pre-trade market color inside the FlexFI BondWidget. By combining SOLVE's direct stream of dealer runs with quote parsing for structured and unstructured messages, traders can evaluate market context, plan execution, and guide automation without toggling between disconnected screens.

About the Integration

- SOLVE's comprehensive fixed income pricing data is available within FlexFI, FlexTrade's fixed income execution management solution.
- SOLVE's direct dealer runs and parsed quote data stream directly into the FlexFI BondWidget.
- The integration gives traders a consolidated view of pre-trade market color inside the workflow where execution decisions are made.
- Pre-trade insights can support execution planning, automation logic, timing decisions, and limit-price guidance.

Why It Matters

- Fixed income liquidity remains fragmented across venues, dealer streams, axes, runs, subject quotes, and unstructured messages.
- Traders need fast access to market color in the same environment they use to route, negotiate, and execute orders.
- Embedding SOLVE data into FlexFI helps convert fragmented pre-trade information into decision-ready execution context.

Use Cases for SOLVE Data in FlexFI

- **Pre-trade price discovery:** View observable market color before routing or responding to RFQs.
- **Execution planning:** Use dealer runs and parsed quotes to assess where liquidity may exist and how pricing is moving.
- **Limit-price guidance:** Inform automation parameters and trader-defined execution thresholds with real-time market context.
- **Workflow consolidation:** Reduce screen switching by bringing SOLVE pricing intelligence into FlexFI's fixed income trading workflow.
- **Best execution support:** Use richer pre-trade liquidity context to support dealer selection, trade strategy, and execution review.
- **Automation readiness:** Feed smart order routing and customizable automation strategies with normalized, actionable market data.

Fragmented Market Color to Actionable Execution Context

FlexFI is designed to help fixed income traders address liquidity and data fragmentation, access electronic protocols, aggregate pre-trade liquidity, and support customizable automation and smart order routing. With SOLVE data integrated into FlexFI, traders can bring additional real-time pricing intelligence and observable market color into that same execution environment.

1. Aggregate

Dealer runs, axes, subject quotes, and parsed market color are collected and normalized.

2. Contextualize

SOLVE pricing intelligence is surfaced in FlexFI's BondWidget for pre-trade decision support.

3. Execute

Traders use that context to plan execution, guide automation, and make faster, more informed decisions.

What SOLVE Provides

- Comprehensive fixed income pricing data for pre-trade transparency
- Direct stream of dealer runs
- Parsing of structured and unstructured quote messages
- AI, NLP, and machine-learning-informed data, analytics, and workflow tools
- Pricing intelligence used by traders for price discovery, trade strategy, and streamlined analysis

What FlexFI Enables

- Coverage across credit, sovereign, agency and municipal bonds, swaps, money market instruments, swaptions, and bond futures
- Native support for RFQ, CTT, CTE, CTR, dark pools, and swarm protocols
- Aggregation of dealer streams, subject quotes, platform axes, runs, and additional market data feeds
- Configurable views of pre-trade liquidity through the BondWidget
- Customizable workflow automation and smart order routing across protocols and platforms

“To me, the system offers great price transparency in real-time and just makes a lot of sense to have when compiling runs/axes and not going out with stale pricing.” — Managing Director, Global Investment Bank

SOLVE is the leading market data platform provider for fixed-income securities, trusted by sophisticated buy-side and sell-side firms worldwide. SOLVE empowers clients to transform the way they bring new securities to market, trade on secondary markets, and value highly illiquid securities.
