

SOLVE Quotes BWIC Monitor

Price the List While It's Still Moving

A BWIC arrives with a deadline attached, and it does not hold still. Sizes get revised, securities are added or pulled, due times move. The SOLVE Quotes BWIC Monitor keeps the list, its revisions, and the data you price with in one session, so what you priced is still what you are bidding.

Why It Matters

- **Price the line in place:** Dealer inventory, current holders, best bid and offer, quote history, and SOLVE Px levels sit in the same session as the list.
- **See what moved:** New and Upd tags flag revised BWICs and securities, at the list level and the security level.
- **Cut the calls across the desk:** Set a status on a security, Pass, Bid, Won, or Lost, and the desk sees who is on what.
- **Bring the screen down to your morning:** Pin the lists you are bidding, hide the rest, and note your thinking on the line as you go.

Pinned lists hold at the top and sort by earliest due time

Set a status and the desk sees who is on what

The screenshot shows the SOLVE Quotes BWIC Monitor interface. The main window displays a list of BWICs with columns for CHG, MKT, Orig, Curr, Name, WAL, Asset Class, Collat, Px Talk, Status, Results, Last Comment, and Ratings. The CHG column is highlighted with a blue callout. The interface also includes a left sidebar with Portfolios and Searches, and a bottom section with detailed views for specific BWICs.

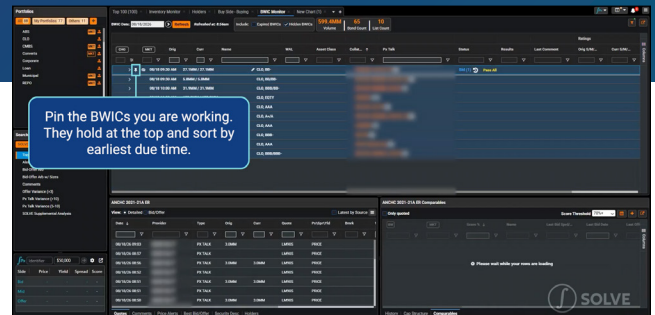

CHG column flags new and updated BWICs and securities

Shown: SOLVE Quotes with the BWIC Monitor, CHG column, pinned lists, and change detail.

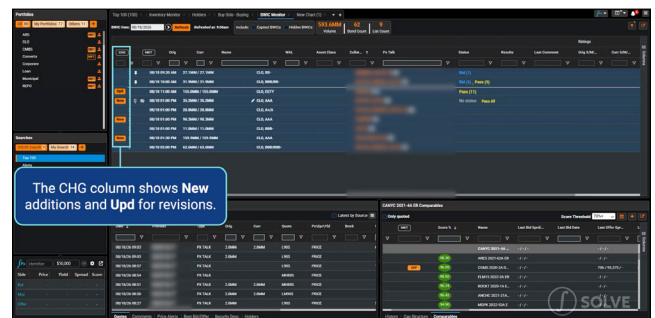

Know what changed before the deadline, not after it.

The SOLVE Advantage

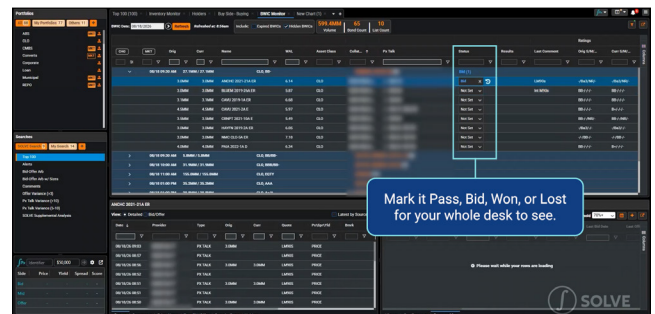

- Track list revisions at both the BWIC level and the security level.
- Set what counts as recent, a rolling time window or everything since your last refresh.
- Filter the grid to only the BWICs and securities that have moved.
- Pin and hide lists, and keep notes on the line, user specific and persistent across sessions.
- Set status on a security, visible to the whole desk.
- Run single-click INTEX scenario analysis on the securities in front of you.
- Built on 30M+ daily quotes parsed from dealer messages, covering 150,000+ structured products securities across CLO, MBS, RMBS, CMBS, and ABS.

Pin the lists you are bidding and hide the rest.

Set how far back the monitor checks for New and Updated changes.

Mark a line Pass, Bid, Won, or Lost, and the whole desk sees it.

Who Uses It

- **Structured Credit Traders, Buy- and Sell-Side:** Bid more lists without losing track of what changed on them.
- **Portfolio Managers:** See BWIC activity against holdings, current holders, and market depth.
- **Analysts:** Build levels with quote history and dealer inventory in the same view as the list.

Clarity in Action

Bidding a BWIC is a timed exercise with incomplete information, and nearly all of the effort goes into the analysis. The SOLVE Quotes BWIC Monitor protects that effort, so what you priced is what you bid.
