FIXED INCOME, REDEFINED:

- SOLVE Relative Value Analysis™
- SOLVE Quotes™
- SOLVE Px™

Purpose-built for the modern buy-side desk.

SOLVE Quotes turns live street messages into structured pre-trade intelligence, parsed by ML/NLP. SOLVE Px is the AI-driven real-time predictive trade pricing engine with a confidence score for every price. SOLVE Relative Value Analysis is the cohort-based decision engine that turns quotes and predictive prices into trade-ready conviction.

Together, they redefine how fixed income decisions get made.

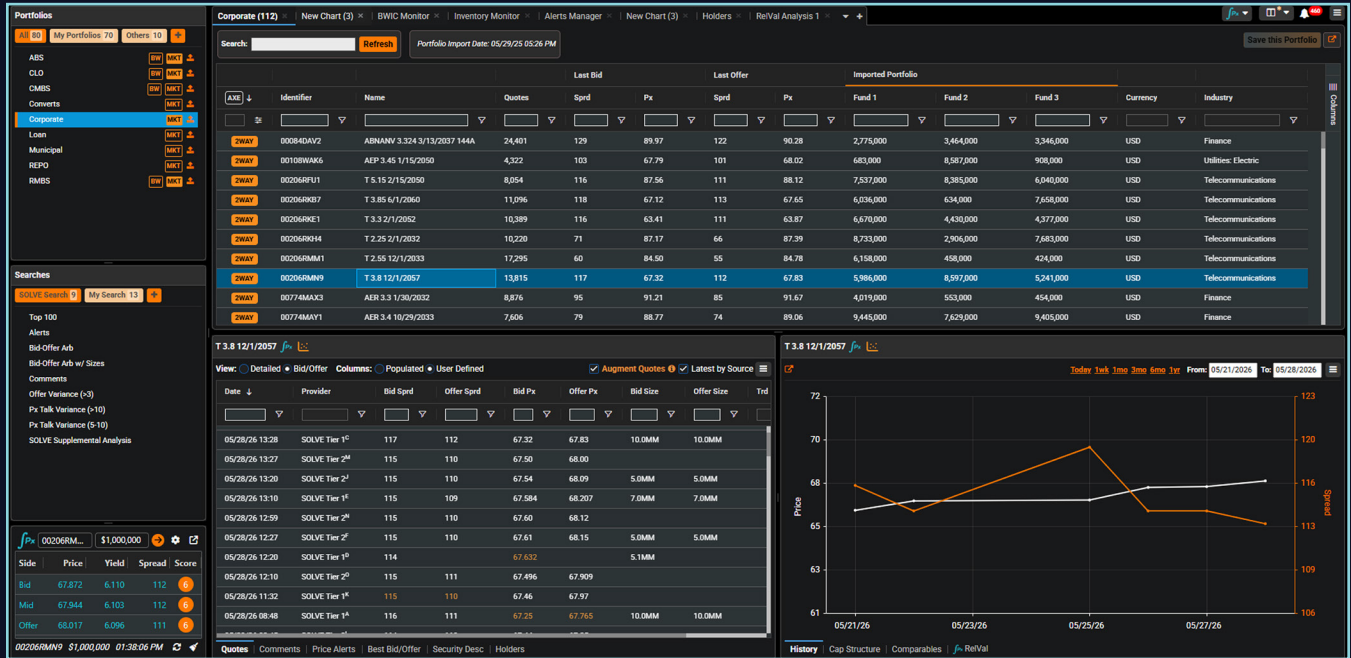

“In a side-by-side trial against its internal pricing model, a leading e-trading platform found SOLVE Px™ would have delivered better outcomes on seven out of every ten trades.”

— Reported to SOLVE by a Managing Director at a National Investment Management Firm

THE INTELLIGENCE LAYER

SOLVE Quotes™

30M+ daily quotes. ML/NLP-parsed from live quote messages. In real time.

- See where the street is quoting right now, not where it was an hour ago.
- Sharper visibility into bid and offer levels, spread color, and where comparable bonds are trading.
- Pre-trade market intelligence at the depth needed for both single-name decisions and portfolio-level allocation.
- Structured intelligence continuously updated from millions of daily street messages.
- The pre-trade foundation that powers predictive pricing and relative value.

For Traders

Confidence that your pre-trade view reflects what the market is actually quoting, not what it was. Move from spotting a trade to executing it without second-guessing the price color.

For Portfolio Managers

Portfolio-level pre-trade context that supports allocation, sizing, and re-balancing decisions with the most current market information available.

PREDICTIVE PRICING

SOLVE Px™

Live market signals. Not yesterday's close.

- A dynamic price for every High Yield, Investment Grade, and Municipal bond, in real time, even on names that haven't traded in weeks.
- Continuous valuation across millions of securities, including the long tail of illiquid names.
- Every price carries a confidence score, even when the market is thin, quiet, or moving fast.
- AI models trained on the deepest aggregated quotes dataset in fixed income.
- A consistent analytical foundation for trading, valuation, and risk decisions.

For Traders

Use SOLVE Px alongside your own pricing to validate, challenge, or fill gaps. A second opinion on every name in your sheet, calculated in real time on live market signals.

For Portfolio Managers

Valuation at current market conditions, not stale marks. Foundation for risk views, allocation decisions, and attribution that don't lag the market.

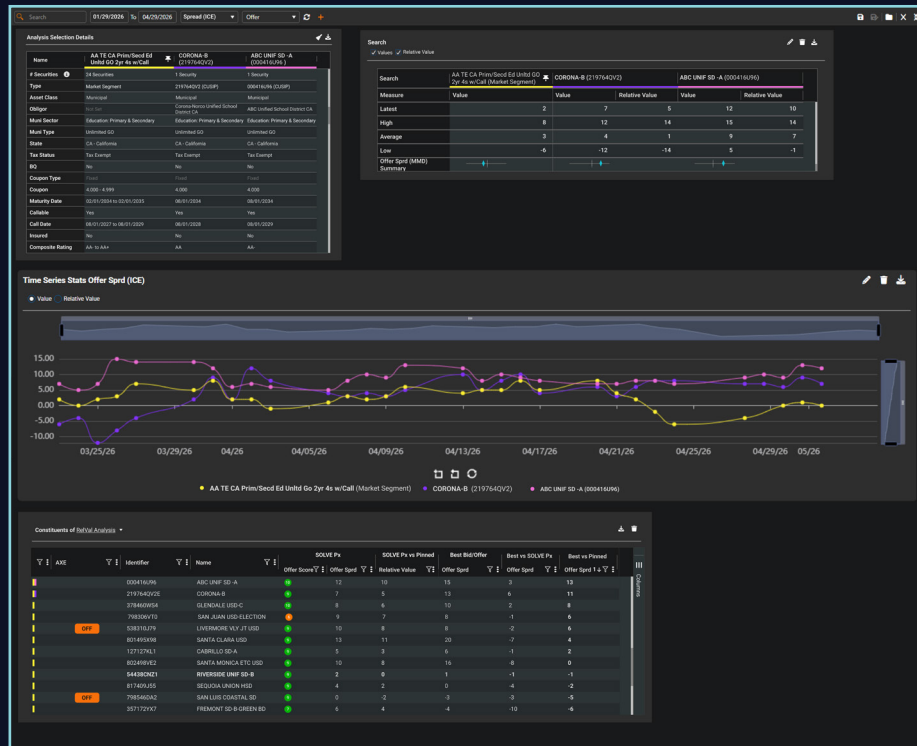

**PREDICTIVE TRADE PRICING BACKED
BY A SOLVE CONFIDENCE SCORE**

COHORT-BASED. CONFIGURABLE. ACTIONABLE.

SOLVE Relative Value Analysis™

A real-time decision framework for fixed income relative value, fueled by SOLVE Quotes and SOLVE Px.

SOLVE Relative Value Analysis turns relative value into a configurable, actionable decision framework. Define cohorts on your own terms. See live market context alongside every comparison. Move from identifying value to acting on it.

For Traders

Pull up a bond in SOLVE Quotes, launch Relative Value Analysis, and see instantly whether it is rich or cheap to its cohort, with the most attractive name surfaced and every read matched against live bids and offers so the call is actionable, not academic.

For Portfolio Managers

See which market segments to move capital into and which to lighten, building cohorts around your own investment guidelines rather than rigid, vendor-defined buckets, and comparing your portfolio against a like cohort on yield or spread for sharper sector allocation and asset selection decisions.

About SOLVE

SOLVE is the leading market data platform provider for fixed-income securities, trusted by sophisticated buy-side and sell-side firms worldwide. Founded in 2011, SOLVE leverages its AI-driven technology and deep industry expertise to offer unparalleled transparency into markets, reduce risk, and save hundreds of hours across front-office workflows. With the largest real-time datasets for Securitized Products, Municipal Bonds, Corporate Bonds, Syndicated Bank Loans, Convertible Bonds, CDS, and Private Credit, SOLVE empowers clients to transform the way they bring new securities to market, trade on secondary markets, and value highly illiquid securities. Headquartered in Connecticut, with offices across the globe, SOLVE is the definitive source for market pricing in fixed-income markets. For more information, visit www.solvefixedincome.com.
