FIXED INCOME, REDEFINED:

- SOLVE Relative Value Analysis™
- SOLVE Quotes™
- SOLVE Px™

Purpose-built for the modern fixed income desk.

SOLVE Quotes turns live street messages into structured pre-trade intelligence, parsed by ML/NLP. SOLVE Px is the AI-driven real-time predictive trade pricing engine with a confidence score for every price. SOLVE Relative Value Analysis is the cohort-based decision engine that turns quotes and predictive prices into trade-ready conviction.

Together, they redefine how fixed income decisions get made.

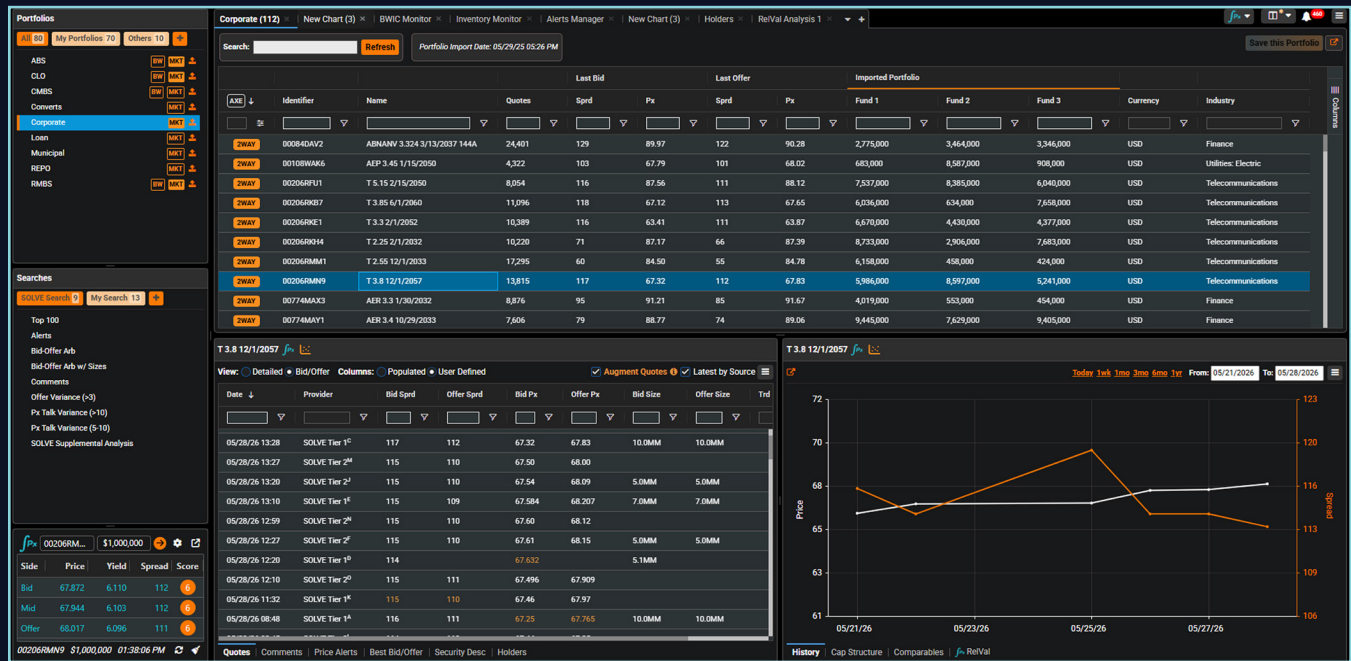

"To me, the system offers great price transparency in real-time and just makes a lot of sense to have when compiling runs/axes and not going out with stale pricing."

— Managing Director, Global Investment Bank

THE INTELLIGENCE LAYER

SOLVE Quotes™

30M+ daily quotes. ML/NLP-parsed from live quote messages.
In real time.

- ML/NLP-parsed quote messages from across the street, organized and structured for immediate use.
- See where the street is quoting right now, not where it was an hour ago.
- Sharper visibility into bid and offer levels, spread color, and where comparable bonds are trading.
- Pre-trade market intelligence at the depth needed for both single-name decisions and portfolio-level allocation.
- Structured intelligence continuously updated from millions of daily street messages.
- The pre-trade foundation that powers predictive pricing and relative value.

BUY-SIDE

For Traders

Confidence that your pre-trade view reflects what the market is actually quoting, not what it was. Move from spotting a trade to executing it without second-guessing the price color.

For Portfolio Managers

Portfolio-level pre-trade context that supports allocation, sizing, and rebalancing decisions with the most current market information available.

SELL-SIDE

For Sales & Coverage

Go out to clients with current color behind every run and axe. Set levels and defend them with structured street intelligence, not a level that's already gone stale.

PREDICTIVE PRICING SOLVE Px™

Live market signals. Not yesterday's close.

- A dynamic price for every High Yield and Investment Grade USD Corporate bond, and Municipal bond, in real time, even on names that haven't traded in weeks.
- Continuous valuation across 1.3+ million securities, including the long tail of illiquid names.
- Bid, mid, and ask sides. Size-specific. Delivered in price, yield, and spread domains.
- AI models trained on the deepest aggregated quotes dataset in fixed income.

"In a side-by-side trial against its internal pricing model, a leading e-trading platform found SOLVE Px™ would have delivered better outcomes on seven out of every ten trades."

— Reported to SOLVE by a Managing Director at a National Investment Management Firm.

BUY-SIDE

For Traders

Use SOLVE Px to validate, challenge, or fill gaps in your own pricing. A real-time second opinion on every position, calculated on live market signals and sized to your trade for voice or automated trading platforms.

For Portfolio Managers

Valuation at current market conditions, not stale marks. Foundation for risk views, allocation decisions, and attribution that don't lag the market.

SELL-SIDE

For Sales & Coverage

Quote with confidence across the full book, not only the active names. Bring defensible, real-time levels and comparable pricing into client conversations and new issue discussions.

BUY-SIDE

Pull up a bond in SOLVE Quotes, launch Relative Value Analysis, and see instantly whether it's rich or cheap to its cohort. Every bond matched against live bids, offers, and axe indications. Analysis that's actionable, not academic.

See which market segments offer attractive value and which are areas to lighten. Build cohorts around your own guidelines and constraints, not rigid vendor buckets. Compare your portfolio against a like cohort on yield or spread for sharper allocation decisions.

SELL-SIDE

Generate trade ideas for the accounts you cover and surface names from your own inventory that represent real value, so you can initiate a client conversation with a compelling analysis of exactly where a bond sits versus a cohort of its peers.

About SOLVE

SOLVE is the leading market data platform provider for fixed-income securities, trusted by sophisticated buy-side and sell-side firms worldwide. Founded in 2011, SOLVE leverages its AI-driven technology and deep industry expertise to offer unparalleled transparency into markets, reduce risk, and save hundreds of hours across front-office workflows. With the largest real-time datasets for Securitized Products, Municipal Bonds, Corporate Bonds, Syndicated Bank Loans, Convertible Bonds, CDS, and Private Credit, SOLVE empowers clients to transform the way they bring new securities to market, trade on secondary markets, and value highly illiquid securities. Headquartered in Connecticut, with offices across the globe, SOLVE is the definitive source for market pricing in fixed-income markets. For more information, visit www.solvefixedincome.com.
